## Edinburgh Postnatal Depression Scale (EPDS) referral pathway - Western Australia

Produced by Statewide Perinatal and Infant Mental Health Program. Reviewed February 2020.

www.kemh.health.wa.gov.au/spimhp/tool-box

This document provides possible referral options for postnatal women in relation to their EPDS score. Please update the contact details and notes section with services and resources from your local area. Also consider screening opportunistically and during treatment. Partners can also be screened.

Cut-off for women is 13 or more out of 30. Cut-off for men is 6 or more out of 30.

## Anxiety risk:

The anxiety subscale is questions 3, 4 and 5. Cut-off for women is 6 out of 9. Cut-off for men is 4 out of 9.

	Cut-off for men is 4 out of 9.			
	Actions	Possible referrals	Contact details	Notes
Score = 0 - 9 (Low risk)		Better Beginnings	www.better-beginnings.com.au, 9427 3130	Family literacy program coodinated through public libraries
	<ul> <li>Check for clinical symptoms not reflected in score.</li> <li>Check literacy and understanding.</li> <li>Score of 0 is unusual. May require further</li> <li>⇒ exploration in case symptoms masked.</li> <li>Offer information about emotional wellbeing, services, and resources.</li> <li>Suggest that she returns if things change.</li> </ul>	Australian Breastfeeding Association	1800 686 268	Counsellors take calls in their own home - be mindful of time
